One front door, one verified directory

AI CONCIERGE

Describe what you need in plain language.

- Searches the real listings across all 17 sections
- Answers “near me” requests
- Hands you off to book, request a quote or make contact
- Speaks Spanish as well as English

17

Directory sections

Businesses, churches, ministries, professionals, counseling, schools, events, conferences and more.

Every badge checked twice

Identity, documents and professional licences are checked; one reviewer proposes, a second approves, and badges renew every 12 months.

LIVE TODAY

Everything built on the network

Tickets

Event pages, checkout, organizer dashboard and livestreams.

Books & media

Catalog, seller dashboard, podcasts and a resource library.

Giving

Give once or monthly to churches and ministries — \$0 platform fee.

Groups

Small groups, home churches and church plants, led through ChurchBuilder.

Discipleship

Plans, progress tracking and mentoring with eligible leaders.

Jobs

Ministry roles, employer dashboard and matched provider leads.

Rides

Request a ride and follow it to drop-off.

CARE safety

Fraud screening, child-safety records and AI theology governance.

Runs on the web and as an installable app today; native iOS & Android apps are planned.

FOR MINISTRIES & PARTNERS

NetworkOS™ — your own network, on ours

A branded member network on the partner's own brand and domain — members, events, groups and a join page — running on ChristianLife.ai.

EARN

70/30

Paid-membership revenue split in the partner's favor — 80/20 above 10K members. Partner plan from \$999/mo; the first 10 founding partners lock their price for 3 years.

LAUNCH

Live in a guided session

An activation wizard covers branding and preview, a clickwrap agreement and booking a partnership call. An embeddable opt-in snippet and pilot invites bring in the first members.

GROW

Apps, sub-networks, dashboards

An installable branded app, multi-brand networks (parent and child), and a partner dashboard for revenue, child networks and billing.

IN DEVELOPMENT · HOME PROTECTOR™

An AI security analyst for the whole family

Home Protector doesn't just notify you when something happens. It understands what is happening, decides whether your family is at risk, and helps take action.

1

Connect

The cameras, alarms, locks, sensors and location apps families already own.

2

Understand

Who lives here, routines, trusted visitors, devices and accounts.

3

Investigate

Specialized AI agents turn weak signals into one incident and explain the risk.

4

Act

Pre-approved playbooks run on their own; high-impact steps wait for the family.

5

Learn

Every incident and piece of feedback means fewer false alarms next time.

What Home Protector does

Command Center

One dashboard for home, family, identity and devices, with a Home Safety Score and the steps to raise it.

AI investigation

Checks cameras, locks, sensors and who's home before calling anything a threat — and says why, in plain English.

You stay in control

Lights and recording run automatically; an alarm asks first; unlocking doors or calling 911 needs your explicit OK.

"Is this a scam?"

Send in an email, text, screenshot, voicemail, QR code or link and get a plain-English risk verdict.

Daily brief

A short morning report: overnight events, doors and alarm, family status, scam findings and device health.

Verified help, not just alerts

Routes the family to verified locksmiths, attorneys, counselors and cyber pros from the network.

Next phase: identity and dark-web monitoring, a child-safety agent, Family Circle protection for grandparents (with their consent), and emergency orchestration.
